Hi Reuben,

I am the Western Regional Sales Manager for Datron and rather excited about the possibility of demonstrating the Datron Scout! I am currently in Florida but returning to Datron Monday the 29th. If you send me your contact info I will call and discuss a demo appointment with you.

Best Regards,

Reuben,

Check out this email (with imbedded video) about the Datron Scout in Libya. This contains real world footage of Libyan artillery forces as recorded through our Forward Looking Infra Red camera. The stills from the flyer are quite remarkable also. If you have enough frequent flyer miles consider a trip to DSEI in London this month!

To help determine our next steps I plan to call you at 8:30am your time tomorrow.

Regards,

George T. Zeigler Jr. | **Datron World Communications, Inc.**

Greetings George,

Scout UAS supports march to Tripoli

It can now be disclosed that during the march to Tripoli the Libyan National Council used the Scout micro UAS to acquire intelligence on enemy positions and coordinate resistance efforts. With only a day and half of training the Libyan National Council forces put the Scout into service on the front line, collecting real-time intelligence on Libyan positions. Watch the video to see actual combat footage from the Libyan desert.

As you can see the quality of the video captured by the Scout provides critical intelligence to forces in the deserts of Libya

Watch this Scout fly at the DSEi show in London

The Scout will be featured in the demo area at DSEi everyday from 10:45 – 11:15 and 14:45 – 15:15. The demonstration will show the Scout launching and providing surveillance during the boarding of the vessel in a simulated hostage situation. The demonstration(s) will occur off the dock adjacent to Excel, entrance 7 on the quayside.

Scout featured in Popular Science

The Scout was recently featured in Popular Science. Be sure to check our news page - <http://www.dtwc.com/news> - for the latest information from Datron.

Sincerely,

Datron Marketing Team

Good Morning George,

First I have to apologize for taking so long to get back to you. I am finally getting through my emails and I also heard your voicemails.

I have communicated w/ Spokane County regarding their program and we're going to take a look at the Scout when they get operational but that may be a few months from now. So, lets talk about a possible demonstration up here in Seattle if you think it is possible to do.

Here is a little info:

- Indoors: In our warehouse which gives us about 20' vertical and 100' x 100' of space horizontal.
- Outdoors: we have a COA for our airframe at Discovery Park and Magnusen Park. (We have yet to fly at Magnusen.) Discovery Park has been great as it is an old military housing neighborhood that has nothing but the cement slabs of the structures.

I am not certain about the weather capabilities but up here in Seattle it is known to be raining most of the year and we are approaching fall quickly. Mid October... or end of October?

Again, sorry for the delay in getting back to you. And thank you for this email and the video. It is impressive results. I'll pass the link along to my co-workers.

Thank you,

Greetings George,
Join Datron, and Police Chiefs from around the world, at the [118th IACP Annual Conference](#) in Chicago, IL October 22 - 26, 2011. Police Chiefs come together at the IACP Annual Conference to foster the exchange of information and experience among police leaders throughout the world, and find solutions to issues they are facing. We look forward to meeting you at booth #543 in McCormick Place West where we will showcase our public safety and aerial reconnaissance products.

Designed for First Responders, Public Safety, and Federal users, [Guardian II](#) radios feature narrow and wide band conventional analog, P25 Digital, and P25 Trunking solutions. Built to keep communications clear in the harshest environments, you manage your investment by choosing the optimal configuration for each user. Guardian II radios are the solution for your communication needs.

The [Datron Scout](#), our lightweight, quad-rotor Micro Air Vehicle designed to provide on-demand intelligence, surveillance and reconnaissance will also be featured. You can see the [Scout in action in Libya](#) on our website.

Reuben,

Thanks for the update - no apologies are necessary. You are a very busy person and we understand and respect your schedule! With that said, we have two scenarios to pursue with regards to setting up a demonstration. To begin we need to know what is your budgeting/project status for acquiring a micro UAS. Do you have funding set aside and are you prepared to make a purchase within the next thirty to sixty days? This information will help us manage our resources appropriately and provide our best service to our best customers! Enjoy the good life in Seattle. Hopefully I can join you soon!

Good Morning George,

I am not privy to the funding source nor amount available... unfortunately. I'm being tasked with finding products that would suit our overall goals of a UAS program within our department. I'd like to give you some info in that regard but unfortunately I don't have any. Lt. Sackman, who you met at AUVSI, would be better suited to answer that.

Realizing that budgets are tight and we both want to get the most out of any visit, are there any trips that are planned to the Pacific NW? Maybe not necessarily to Seattle, but in our area? I don't think Spokane is past their initial training. I'm waiting for them to send me an invite to see them fly.

And thank you for sending the links to the videos. Impressive.

Reuben,

Check out this email (with imbedded video) about the Datron Scout in Libya. This contains real world footage of Libyan artillery forces as recorded through our Forward Looking Infra Red camera. The stills from the flyer

are quite remarkable also. If you have enough frequent flyer miles consider a trip to DSEi in London this month!

To help determine our next steps I plan to call you at 8:30am your time tomorrow.

HOME PRODUCTS GOVERNMENT SOLUTIONS CONTACT US

Greetings George,

Scout UAS supports march to Tripoli

It can now be disclosed that during the march to Tripoli the Libyan National Council used the Scout micro UAS to acquire intelligence on enemy positions and coordinate resistance efforts. With only a day and half of training the Libyan National Council forces put the Scout into service on the front line, collecting real-time intelligence on Libyan positions. Watch the video to see actual combat footage from the Libyan desert.

As you can see the quality of the video captured by the Scout provides critical intelligence to forces in the deserts of Libya

Watch this Scout fly at the DSEi show in London

The Scout will be featured in the demo area at DSEi everyday from 10:45 – 11:15 and

14:45 – 15:15. The demonstration will show the Scout launching and providing surveillance during the boarding of the vessel in a simulated hostage situation. The demonstration(s) will occur off the dock adjacent to Excel, entrance 7 on the quayside.

Subject: RE: Datron: Scout UAS Demonstration/Budgeting Conversation

Hello George,

I am currently scheduled for training on that day but things can change. What are you thinking? If you are going to be in town then I can make arrangements but I am not sure how many decision makers in my department would be available.

So far I've been able to email several agencies (about 20) in the area and invite them to any UAS demos. It has been hit and miss but that may be because the airframes are not what they are interested in.

Thank you,
Officer Omelanchuk

Reuben,
What does your schedule look like in the afternoon of Oct 25th?

Also, can you coral other agencies to join in a presentation/demo session that are currently pursuing UAV technology?

Subject: RE: Datron: Scout UAS Demonstration/Budgeting Conversation

Good Morning George,

I am not privy to the funding source nor amount available... unfortunately. I'm being tasked with finding products that would suit our overall goals of a UAS program within our department. I'd like to give you some info in that regard but unfortunately I don't have any. Lt. Sackman, who you met at AUVSI, would be better suited to answer that.

Realizing that budgets are tight and we both want to get the most out of any visit, are there any trips that are planned to the Pacific NW? Maybe not necessarily to Seattle, but in our area? I don't think Spokane is past their initial training. I'm waiting for them to send me an invite to see them fly.

And thank you for sending the links to the videos. Impressive.

Thank you,

Rueben,
Thanks for the update - no apologies are necessary. You are a very busy person and we understand and respect your schedule! With that said, we have two scenarios to pursue with regards to setting up a demonstration. To begin we need to know what is your budgeting/project status for acquiring a micro UAS. Do you have funding set aside and are you prepared to make a purchase within the next thirty to sixty days? This information will help us manage our resources appropriately and provide our best service to our best customers! Enjoy the good life in Seattle. Hopefully I can join you soon!

Good Morning George,

First I have to apologize for taking so long to get back to you. I am finally getting through my emails and I also heard your voicemails.

I have communicated w/ Spokane County regarding their program and we're going to take a look at the Scout when they get operational but that may be a few months from now. So, lets talk about a possible demonstration up here in Seattle if you think it is possible to do.

Here is a little info:

- Indoors: in our warehouse which gives us about 20' vertical and 100' x 100' of space horizontal.
- Outdoors: we have a COA for our airframe at Discovery Park and Magnusen Park. (We have yet to fly at Magnusen.) Discovery Park has been great as it is an old military housing neighborhood that has nothing but the cement slabs of the structures.

I am not certain about the weather capabilities but up here in Seattle it is known to be raining most of the year and we are approaching fall quickly. Mid October... or end of October?

Again, sorry for the delay in getting back to you. And thank you for this email and the video. It is impressive results. I'll pass the link along to my co-workers.

OK George,

It looks like Thursday afternoon will be best. I have these questions:

1) what time frame?

GTZ> Let say 1:30 - onward!

2) what location... indoors or out? I have either our warehouse or possibly Magnussen Park.

GTZ> Indoors for a basic power point presentation - outdoors to fly (need GPSI).

3) what would you need from me?

GTZ> I may need permission to invite a few other local entities to witness the demo.

Projector and room to present in.

Lat/Long of park would be nice (if you have them).

Once this is a go on your end I can easily send out my emails to get agencies there.

Thank you,

Hello George,

I am currently scheduled for training on that day but things can change. What are you thinking? If you are going to be in town then I can make arrangements but I am not sure how many decision makers in my department would be available.

So far I've been able to email several agencies (about 20) in the area and invite them to any UAS demos. It has been hit and miss but that may be because the airframes are not what they are interested in.

Thank you,
Officer Omelanchuk
Seattle Police Department
Homeland Security

Good Morning George,

I am not privy to the funding source nor amount available... unfortunately. I'm being tasked with finding products that would suit our overall goals of a UAS program within our department. I'd like to give you some info in that regard but unfortunately I don't have any. Lt. Sackman, who you met at AUVSI, would be better suited to answer that.

Realizing that budgets are tight and we both want to get the most out of any visit, are there any trips that are planned to the Pacific NW? Maybe not necessarily to Seattle, but in our area? I don't think Spokane is past their initial training. I'm waiting for them to send me an invite to see them fly.

And thank you for sending the links to the videos. Impressive.

Thank you,

Good Morning George,

First I have to apologize for taking so long to get back to you. I am finally getting through my emails and I also heard your voicemails.

I have communicated w/ Spokane County regarding their program and we're going to take a look at the Scout when they get operational but that may be a few months from now. So, lets talk about a possible demonstration up here in Seattle if you think it is possible to do.

Here is a little info:

- Indoors: in our warehouse which gives us about 20' vertical and 100' x 100' of space horizontal.
- Outdoors: we have a COA for our airframe at Discovery Park and Magnusen Park. (We have yet to fly at Magnusen.)
Discovery Park has been great as it is an old military housing neighborhood that has nothing but the cement slabs of the structures.

I am not certain about the weather capabilities but up here in Seattle it is known to be raining most of the year and we are approaching fall quickly. Mid October... or end of October?

Again, sorry for the delay in getting back to you. And thank you for this email and the video. It is impressive results. I'll pass the link along to my co-workers.

Subject: RE: Datron: Scout UAS Demonstration/Budgeting Conversation

OK!

Location: I have two options for you. 1) our warehouse which has a large outdoor location for flight. It is by a river and I don't know if that will be OK. 2) Discovery Park. Last time I went there, last week, they were actively tearing up the cement foundations so I don't know the status of it this week, much less next week. 3) Magnussen Park. We have a COA for that location as well but we haven't actually flown there to know the exact location.

Either #2 or #3 will work as I would be driving out the command vehicle which has an indoor room w/ computers for any demo you'd like to give. The only catch is that this week I will have to scope out the location and see its availability for next week. Once I do that I will send you the lat/long.

Thank you,

Subject: Datron Scout Air Reconnaissance System (UAS) Demonstration
Importance: High

George,

This is the email that I plan on sending out ASAP to get people to attend. Read it over and let me know if I miss anything or need to add/remove anything.

Thanks - Reuben

Your department is being invited to attend a demonstration of a UAS and its particular capabilities for Law Enforcement use. If you are not able to attend I would appreciate this invitation being passed to any of your colleagues who may be interested and available. This is an informal demonstration and there will be time for questions to be answered before and after the demonstration.

Who: Datron World Communications - Scout Air Reconnaissance System

What: The Datron Scout Air Reconnaissance System is a small, rugged and lightweight unmanned Micro Air Vehicle designed to capture and transmit high quality video and images in the field. The Scout's mobility as a vertical take-off and landing (VTOL) vehicle affords it the ability to silently hover and stare at any point of interest, without the need for a fixed launch or landing platform. A robust design coupled with snap together assembly makes the Scout a perfect fit for missions in a broad range of environments where measuring time in seconds will matter. (<http://dtwc.com/products/aerial-recon/scout-air-reconnaissance-system>)

Why: There is a growing interest and need for UAS within the LE community. Datron Scout is already being used out in the field and recently has played a part in Libya. See their website for actual video. This will be an opportunity to see and ask questions regarding a possible UAS for LE purposes.

Date/Time: October 27th, 2011, 1330 hrs.

Location: Seattle Magnusson Park. Head East from I-5 and NE 65th St. Follow 65th to park entrance (at Sandpoint Way) and continue straight. At next stop we will either be set up just to the left or right.
47°40'34.01"N 122°15'5.25"W

If you have any questions please feel free to reply in email or call me at 206-255-7593 (cell) or 206-733-9364 (desk)

Thank you,

Officer Omelanchuk #6802

Hi George,

I got your voicemail and I don't know if it is too early to call you while you are in town.

Well today I have a meeting at 0900/0930 until hopefully just 1030. Then after that I would be more than happy to meet you at Magnuson Park or even at our warehouse to chat. I verified that we have PowerPoint on the laptop in the command vehicle as requested.

Let me know what your schedule is and I can probably accommodate.

Thank you,

Reuben,

Attached is your quotation for a completely refurbished Datron Scout UAS utilizing our standard 5MP camera. This system is merely a part of the "special partnership" discussed with Lt. Britt last month. The complete system includes flyer, base station, tablet pc (with software), two sets of rotors, two sets of landing legs, six batteries, rapid charger, and two carry cases.

It is no secret we need partners in the field to provide use cases and operational hours for our product. Hopefully, this is the beginning of one such relationship. Datron is very eager to work with Seattle PD as your UAS program transitions from training and evaluation grade to realistic operational platforms.

We request an opportunity to discuss terms and expectations with you prior to final decisions. Therefore, review the attachment and share any concerns with me for immediate resolution.

SEATTLE POLICE DEPARTMENT MEMORANDUM

TO: Donna DiMola
cc: Lieutenant Sackman

DATE: 01/21/2011

FROM: Officer Omelanchuk

SUBJECT: Private Pilot Ground School

Hello Donna,

I am writing this memorandum to provide further information for the purchase request regarding Private Pilot Ground School. The necessity of this training stems from the need to satisfy FAA rules and regulations for the operation of a UAV. The cost for the private pilot ground school includes tuition and books but does not include any associated costs with the taking of the FAA examination.

The training is currently going to be limited to four officers:

- Officer R. Omelanchuk
- Officer J. Britt
- Officer J. T. Allen
- Officer Garrett

Thank you – Officer Omelanchuk

SEATTLE POLICE DEPARTMENT MEMORANDUM

TO: Chris Steel

DATE: 04/14/2011

FROM: Officer Omelanchuk

SUBJECT: FAA Ground School Examinations

Hello Chris,

I am writing this memorandum to notify you of an additional cost for the completion of the FAA required ground school that was not included in the original purchase request of the ground school. This additional cost is for the knowledge test to be taken at the conclusion of the required FAA Helicopter Ground School.

The cost of one exam is \$150. Currently there are four persons attending ground school bringing the total of the exam costs to \$600.

The total can be paid to Wings Aloft as they are an authorized FAA testing facility.

Thank you,

Officer Omelanchuk

Omelanchuk, Reuben

Subject: FAA Ground School Examinations

Hello Chris,

I had been speaking with Donna DiMola regarding the required examinations for the conclusion of our ground school. Each exam is \$150 which would be an additional \$600 for this round of persons going through ground school.

Instead of having to create a separate 1.5 or travel training request, Donna suggested I contact you to get approval to have the additional amount added to the current training request.

What information do you need from me to get this approved and would you like a hard-copy memo to you regarding it?

Thank you,
Officer Omelanchuk
Seattle Police Department

SEATTLE POLICE DEPARTMENT MEMORANDUM

TO: A/C Metz
Click here to enter text.

FROM: Officer Omelanchuk
Homeland Security/CBRNe/UAS

SUBJECT: Explanation of Private Pilot Training Costs

DATE: May 19, 2012

Sir,

This memorandum is to clarify any questions that may arise regarding the cost of training. This training is required by FAA regulations to operate a UAS within 5NM of any airport/heliport/sea-base plane port within Class D airspace. All FAA approved training facilities in the Seattle Metropolitan area were contacted for the purpose of obtaining a cost and Rainier Flight Services was selected based upon cost and location.

A cost sheet was received for \$7600 and a training request was submitted for \$8000. The difference accounts for any applicable taxes as well as the likelihood that the students will need more than the 40-hour minimum of flight training. (All schools have explained that although 40-hours is the FAA minimum requirement, the average number of hours a student requires to obtain their private pilot license is 55 hours.)

Because weight of the passengers is a large consideration in what aircraft flown, a larger aircraft may be needed for flight which would also incur a slightly higher cost.

If you have any questions regarding this training request please feel free to contact me and I would be glad to provide you with any information.

Thank you,

Officer Omelanchuk #6802
Homeland Security/CBRNe/UAS

Omelanchuk, Reuben

Subject: Flight Training

Good afternoon,

Attached is the .pdf with a cost estimate for the private pilot license. You will really see a cost savings in that the student would be training multiple times a week. Knowledge retention and skill building will be much better and you will come in with a lower total cost. We would dedicate an instructor to your students that would be available any time. The smaller aircraft (C152) is a cost savings, but is weight limited. It may be a better option to do "paired training" in the C172. This is where we can have the student not flying observe from the back seat of the C172 and learn from the student that is flying. This has proven to save time and money in training. Our on-line course for ground school is also the most cost effective way to attain the ground knowledge. Keep in mind that the cost will be different with each student depending on how fast they grasp the knowledge and skill.

If the officers will be operating a technically advanced aircraft, our training program using the state of the art G1000 avionics system will be the best when transferring to newer aircraft or UAV's. Our facility includes G1000 equipped aircraft, full size flight simulator, and free use of computer lab courses. When looking at flight schools keep in mind the instructors and syllabus that you will be using. I believe that our airline background and vast experience in professional aviation will be the best fit for your officers.

Please feel free to contact us at any time with questions.
Thank you.

Ground school \$239
Equipment \$189
Knowledge exam \$100
Aircraft Rental 40hrs \$3560-\$5960
Instructor \$3000
FAA Exam \$400

Total Cost in C152 ~ \$7,638
Total Cost in C172 ~ \$10,038

Subject: Flight Training

Good afternoon,

Attached is the .pdf with a cost estimate for the private pilot license. You will really see a cost savings in that the student would be training multiple times a week. Knowledge retention and skill building will be much better and you will come in with a lower total cost. We would dedicate an instructor to your students that would be available any time. The smaller aircraft (C152) is a cost savings, but is weight limited. It may be a better option to do "paired training" in the C172. This is where we can have the student not flying observe from the back seat of the C172 and learn from the student that is flying. This has proven to save time and money in training. Our on-line course for ground school is also the most cost effective way to attain the ground knowledge. Keep in mind that the cost will be different with each student depending on how fast they grasp the knowledge and skill.

If the officers will be operating a technically advanced aircraft, our training program using the state of the art G1000 avionics system will be the best when transferring to newer aircraft or UAV's. Our facility includes G1000 equipped aircraft, full size flight simulator, and free use of computer lab courses. When looking at flight schools keep in mind the instructors and syllabus that you will be using. I believe that our airline background and vast experience in professional aviation will be the best fit for your officers.

Please feel free to contact us at any time with questions.
Thank you.

Ground school \$239
Equipment \$189
Knowledge exam \$100
Aircraft Rental 40hrs \$3560-\$5960
Instructor \$3000
FAA Exam \$400

Total Cost in C152 ~ \$7,638
Total Cost in C172 ~ \$10,038

Thanks Bradley,

A couple things... We have most of the pilot kit so there will probably be a small cost savings there, and we also have a Class II medical. But with the information you have given me, I will put in the request for two persons.

Thank you,

PRIVATE PILOT COST SHEET

This sheet itemizes the costs associated with obtaining a Private Pilot Certificate. There are many other resources available to our students including a lending library, DVD instructional videos and FAA publications we provide for **FREE** because our goal is to make training as affordable and efficient as possible.

GROUND SCHOOL

The Jeppesen Online Private Pilot course contains ground school and maneuvers lessons using a combination of audio, video and graphics to clearly explain each topic. Each lesson contains links to test questions, human factors information and interesting case studies to further your learning and serve as the perfect tool to prepare for the FAA knowledge exam. Lessons can be accessed from any computer with internet access and reviewed as many times as you like. This course fully integrates with our custom flight training syllabus and online scheduling system.

\$239

PRIVATE PILOT KIT

The Private Pilot Kit contains all of the training tools and reference literature needed to prepare for the knowledge and practical exams. (knowledge test guide, E&B, VFR plotter, logbook, charts, VFR kneeboard, aircraft checklist and student bag)

\$189

MEDICAL / STUDENT CERTIFICATE

3rd class medical exam from an Aviation Medical Examiner.

\$100

FAA KNOWLEDGE EXAM

Multiple-choice exam administered by computer.

\$150

AIRCRAFT RENTAL*

FAA minimum required 40 hours flight training:

Cessna C152 - \$89.00/hr	\$3560
Cessna C172 - \$135.00/hr	\$5400
Cessna C172 G1000 - \$149.00/hr	\$5960

\$3,560

FLIGHT INSTRUCTION*

Dual instruction including flight training, preflight and postflight briefings. (50 hrs @ \$60/hr)

\$3,000

FAA PRACTICAL EXAM

Oral and flight exam with FAA designated examiner.

\$400

TOTAL PRIVATE PILOT COST TRAINING IN A C152

~\$7,600

*Aircraft and instructor hours based on FAA minimum requirements. The national average is 75 hours of flight time for a Private Pilot Certificate. Rainier Flight Service averages 50 hours. Does not include sales tax for aircraft rental. Ask about our block rate discount.

Frequently Asked Questions

What can I do to minimize the cost of training?

Preparation! The contents of each lesson are itemized in the training syllabus so you know exactly what to expect each flight. If you study the material in advance then the instructor can focus on answering your questions, not introducing new material.

How long does it take to learn to fly and get a pilot certificate?

The same variables that affect the cost of learning to fly will affect the time it takes to earn your certificate. The FAA has established the minimum number of flight hours needed to obtain a certificate. The minimum for a private pilot certificate under Part 61 is 40 flight hours but a true average is between 50 and 60 hours. These hours can be spread over a time span of several months to a year or more depending on your schedule and timeline.

How much experience do you have instructing?

We have a wide variety of instructing experience ranging from collegiate programs to small uncontrolled airports. Students include brand new pilots to teaching instructors how to teach. As airline pilots we have gained valuable experience in virtually all flying conditions that we use to impart good flying habits and decision-making skills.

How and where can I get a student pilot certificate?

An aviation medical examiner (AME) typically gives you a student pilot certificate to as part of the third class medical exam. A list of local AMEs can be found linked from our website (www.RainierFlightService.com) on the Resources page.

Some flight schools have aircraft with "glass cockpits" and others do not. Are there any advantages of training in either aircraft?

That depends on your personal goals. If you plan on buying an airplane with a glass cockpit then training in a plane with similar equipment may be beneficial. If you plan to fly recreationally in rental aircraft it is a good idea to be proficient in both. Glass cockpit airplanes are usually more expensive to operate so cost may factor into your decision.

What kinds of test to I have to take?

Each flight certificate or rating requires that the student complete three areas of competency, under the review of a person designated by the FAA to conduct the tests. Near the end of your flight training you will need to pass a written (knowledge) test. This is taken on a computer with multiple-choice questions and must be passed with a score of 70% or higher. When your training is complete your flight instructor will endorse you for the oral and practical exams. The FAA designated examiner will ask you questions to determine if you have sufficient knowledge of the subject matter. In the practical exam you will demonstrate to the examiner you can safely operate the airplane in accordance with set standards. The oral and practical typically happen on the same day as part of one appointment.

What about insurance?

Our insurance policy automatically covers you as a renter or student up to a limit of \$100,000 per passenger for bodily injury and \$1,000,000 for liability. Additional renters insurance is affordable and available through Avemco Insurance. Please contact us for more information or to obtain a copy of our policy.

Subject: Scheduling for flight training

Hi Reuben,

Brad asked me to follow up with you regarding scheduling your candidates beginning next week. I left a voicemail earlier this afternoon, but sometimes email is easier to connect on. Please let me know when you would like your first pilot to begin training next week, and I'll get it on the schedule. Also, if you could let me know how many times a week they would like to train, and I'll make a standing reservation for those days and times. Brad indicated that your first pilot would like to come in at 8am. Most lessons are ~3 hours blocks, but the first week is a little bit shorter as we are doing the admin part of the course (Introduction, paperwork and computer login, safety briefing, etc).

Feel free to call or email anytime.

All the best,

Subject: RE: Scheduling for flight training

Good Morning Barry,

Thanks for the communication, I appreciate it. Jim Britt and I will be the first two students and I can start next week. Jim could start then as well but since he works patrol and has to be released, there is some administrative issues that need to be worked out on our end.

He also works a different schedule than me. I prefer early mornings where Jim mid/late morning. Our schedules:

Me: M-F 0600-1500 w/ every other F off.

Jim: A rotating schedule of work 4, off 2, 1100-2000.

Maybe I would be able to come next week on Tue and Thu and knock out most of those items. If it works out Jim would be with me too.

Thank you!

Reuben

Sent: Friday, June 01, 2012 7:38 PM
To: Omelanchuk, Reuben
Subject: Rainier Rate Reminder

Just a quick reminder - the new airplane rates are effective today as follows:

Student-

C162 \$99

C172S \$135

C172 G1000 \$145

Renter -

C162 \$109

C172S \$145

C172 G1000 \$155

If you are training for a certificate or rating you are eligible for the Student rate. If you are flying recreationally or not enrolled in a training course you fall under the Renter rate.

This also eliminates the 'block rate' discount. You are still welcome to pay in convenient increments or by the lesson but must maintain a zero or positive balance to dispatch.

In essence the Student rate is our old block rate adjusted for rising fuel costs. Please contact us anytime if you have any questions.
